Task 001: First 10 Viral Videos for the Korea Car Export Company

By Viral Max, 2026-10-26

The strategy in one line: make *you* the "Korea Car Guy", the person who shows the world what Koreans hide: how cheap and how clean cars are here, and exactly what it costs to get one home. Every video is filmed on **one phone**, mostly **by you alone**, in places you already go (dealer lots, auctions, the port, the street).

> **Before filming:** fill in your client countries in `viral-max/teach/lessons.md` and your real costs in `viral-max/tools/destinations.json`. Every price on screen should come from `python3 viral-max/tools/landed_cost.py` for that exact car. Replace `[CITY]`, `[COUNTRY]`, and the `₩ / $` numbers below with real ones from the day you film. **Never show fake prices.**

Gear: phone (4K 30fps, vertical 9:16), a clip-on wireless mic (about $20–40), a small phone gimbal (optional).
Edit in: CapCut (auto-captions, trending sounds, templates).
Post to: TikTok, Instagram Reels, and YouTube Shorts, same video with a different caption.

Shooting-day checklist (film all 10 in 2–3 days)

Location	Videos you can shoot there
Used-car dealer complex (e.g. Incheon Songdo/Ongnam, Seoul Janganpyeong, Suwon)	#1, #2, #4, #5, #6, #9
Car auction (Lotte, Hyundai Glovis, K Car)	#3
Port / container yard (Incheon)	#7, #8
Street / parking lot / your office	#10, #9

B-roll to always collect (5 seconds each, you'll reuse it forever): rows of cars from above, key in hand, engine start, odometer close-up, Korean Carhistory report on a phone, door closing, seat ventilation button, container doors closing, ship horn, a Korean street at night with cars, and you walking toward the camera.

🎬 VIDEO 1: "Guess the Price" (your signature series)

Length: 20–25s | **People:** just you | **Filming time:** 10 min per episode | **Series potential:** ∞

Why it goes viral: guessing games make people comment, comments push the video, and the price reveal at the end keeps people watching to 100%. People argue about the price in the comments, which gives you free reach.

Shot list and script:

Time	Shot	You say (voiceover or on camera)	On-screen text
0–1s	Fast push-in toward a shiny Palisade / Carnival at a lot	"Guess how much this costs in Korea."	**GUESS THE PRICE (KR) #1**
1–5s	Quick cuts: wheels, interior, panoramic roof, odometer	"2022, 38,000 km, full options, no accidents."	2022 · 38,000 km · 0 accidents
5–10s	Show the Carhistory report on a phone	"Here's the official accident history. Clean."	✅ Official history: CLEAN
10–14s	Close-up of your face	"Write your guess in the comments. In your country it costs around $___."	🤔 Your guess?
14–18s	Turn the price tag / phone screen toward the camera	"In Korea? ~~₩~~. ***That's $***."	**KOREA: $___**
18–22s	Point to camera	"Delivered to [CITY] with everything included? $___. Comment PRICE and I'll send you the full breakdown."	📦 Delivered to [CITY]: $___ · Comment **PRICE**

Caption: Guess the price before the end 👀 Korea vs [COUNTRY] #korea #carsfromkorea #palisade #carexport #guesstheprice
Sound: trending suspense sound at low volume plus real lot sounds.
Pro tip: in the next episode, reply to the comment that guessed closest. It builds community.

🎬 VIDEO 2: "The Receipt" (where the money goes)

Length: 25–30s | **People:** just you | **Filming time:** 15 min

Why it goes viral: people *save* this (saves are a strong ranking signal), and it destroys the #1 objection ("import is complicated and expensive"). Transparency builds trust.

Shot list and script:

Time	Shot	Script	On-screen
0–2s	You holding a long paper receipt that unrolls to the floor (print it from `landed_cost.py`)	"This is EVERYTHING it costs to bring this car from Korea to [CITY]."	**REAL COST: KOREA → [CITY]**
2–6s	Car behind you	"Car price in Korea: $___"	line 1 highlights
6–10s	Finger slides down the receipt	"Documents and truck to the port: $. ***Ship: $***."	lines 2–3
10–16s	Keep sliding	"Customs, taxes, certification: $. ***Delivery to your city: $***."	lines 4–6
16–20s	Tap the total	"Total: $___."	**TOTAL: $___**
20–25s	Show the same car's local market price on your phone (screenshot of a local listing site)	"Same car in [COUNTRY]: $. ***You save $***."	💰 **YOU SAVE $___**
25–28s	Point	"Comment your city and I'll calculate yours."	Comment your **CITY** 👇

Caption: Every dollar, no hidden fees. Save this before you buy a car 📌
Series: one receipt per popular model and country.

🎬 VIDEO 3: "10 Seconds to Bid" (Korean car auction POV)

Length: 20s | **People:** just you | **Filming time:** 20 min at an auction (check filming rules, film your own screen or the hall if allowed)

Why it goes viral: pressure, countdown, and an exotic world most people never see. Wins and losses are dramatic.

Shot list and script:

Time	Shot	Script	On-screen
0–1s	Auction screen / hall, beeping	"I have 10 seconds to buy this Sorento for my client."	⏱️ **10 SECONDS**
1–6s	Car photos on screen, fast cuts	"Client in [CITY], budget $. ***Market says ₩***."	Budget: $___
6–12s	Your finger hovering, price climbing (real-time)	"Come on, come on..." (heartbeat sound)	₩ climbing...
12–15s	The win/lose moment	"WON IT!" / "Too expensive, I walk away. Never overpay for a client."	✅ WON / ❌ TOO HIGH
15–20s	Your face, relieved	"Want me to hunt one for you? Comment AUCTION."	Comment **AUCTION**

Pro tip: losing videos work as well as winning ones. Walking away shows you protect clients' money.

🎬 VIDEO 4: "Korean Grandpa's Car" (why Korean used cars look new)

Length: 20–25s | **People:** just you | **Filming time:** 10 min

Why it goes viral: it breaks a belief ("used = destroyed"). Viewers can't believe a 4-year-old car looks this new.

Script:

Time	Shot	Script	On-screen
0–2s	Peel the plastic still on the seat / show a spotless trunk	"This car is 4 years old. In Korea, this is USED."	**"USED" in Korea** 😳
2–8s	Odometer, untouched pedals, seat, engine bay	"14,000 km. One owner. Driven to church on Sundays." (only if true. Say what the history shows)	14,000 km · 1 owner
8–14s	Carhistory report on phone	"Korea has an official database. Every accident, every owner. You can't hide anything."	📄 Official history
14–20s	Wide shot of the dealer complex, thousands of cars	"And there are thousands like this. Koreans change cars every 3–4 years."	Thousands like this 👇
20–24s	You to camera	"Want one? Comment KOREA."	Comment **KOREA**

🎬 VIDEO 5: "Your Budget, Korea's Answer"

Length: 30s | **People:** just you | **Filming time:** 20 min at one big lot

Why it goes viral: everyone instantly checks their own budget. It's personal, watched to the end, and gets saved.

Script: walk past 4 cars and stop at each one.

Time	Shot	Script	On-screen
0–2s	You walking, cars around	"What does Korea give you for your money? Delivered to [CITY]."	**YOUR BUDGET = ?**
2–8s	Kia Morning / Ray / Avante	"$10,000: ..."	**$10K →** model, year, km
8–14s	Tucson / Sportage / K5	"$20,000: ..."	**$20K →** ...
14–20s	Sorento Hybrid / Santa Fe / Carnival	"$30,000: ..."	**$30K →** ...
20–26s	Genesis GV80 / Palisade top trim	"$45,000: a Korean Mercedes."	**$45K →** GV80 👑
26–30s	You to camera	"What's your budget? Comment it, and I'll find your car."	Comment your **BUDGET**

All prices must be **delivered prices** from `landed_cost.py`.

🎬 VIDEO 6: "3 Traps When Buying a Car from Korea" (authority and fear)

Length: 30–35s | **People:** just you | **Filming time:** 15 min

Why it goes viral: fear gets shares ("send this to your brother who's importing a car"), and it positions you as the honest expert.

Script:

Time	Shot	Script	On-screen
0–2s	You, serious, hand up to stop	"Don't buy a car from Korea until you watch this."	⚠️ **3 TRAPS**
2–10s	Show a car with repainted panels and a paint thickness gauge (about $30 tool)	"Trap 1: 'no accidents', but the paint gauge says repainted. Always measure."	Trap 1: hidden repaint
10–18s	Water lines / rust under seats (or a photo)	"Trap 2: flood cars. Check under the carpet and the seat rails."	Trap 2: flood car 🌊
18–26s	Carhistory report: owners, insurance payouts	"Trap 3: no official history check. In Korea it costs a few dollars. If the seller refuses, run."	Trap 3: no history check
26–33s	You	"I check all three before every car. Comment CHECK and I'll check any Korean car for you."	Comment **CHECK**

🎬 VIDEO 7: "POV: Your Car Is Leaving Korea" (satisfying ASMR)

Length: 15–20s | **People:** just you (filming) | **Filming time:** 30 min at the port/container yard during a loading

Why it goes viral: satisfying process videos (loading, strapping, doors closing) loop endlessly, and the "POV" format is evergreen.

Script: almost no talking. Natural sounds plus a soft trending sound.

Time	Shot	On-screen
0–2s	Car slowly driving into the container	**POV: your car is leaving Korea (KR)**
2–6s	Close-ups: wheel straps tightened, ratchet clicks	🔒 strapped in
6–10s	Second car lifted on the rack above (4 cars per 40ft)	4 cars · 1 container
10–13s	Container doors close, seal clicked	🔐 sealed
13–17s	Wide shot: the container on a truck/crane, ship in background	Next stop: [CITY] 🚢
17–19s	Text only	Want yours on the next one? Comment **SHIP**

Caption: Next container leaves [date]. Want a spot? 🚢

🎬 VIDEO 8: "Delivering [Client]'s Car: Day 1 / Day 30" (journey series)

Length: 20–30s per part | **People:** you plus the client on video call (with permission) | **Filming time:** 5–10 min per step

Why it goes viral: serialized stories bring followers back ("Part 2 when?"). It's real social proof from a real client and a real car. It's the strongest trust video you can make.

Parts (film whenever it happens, 5–7 parts):
1. **"I'm buying a car for a stranger in [CITY]"**: show the car, voice note or video call with the client (face or voice only, with permission). On-screen: *Budget $___ · Part 1.*
2. **Inspection**: paint gauge, history report, test drive. *"Would you buy it? I'm sending it."*
3. **Paperwork**: show the export deregistration doc being stamped (blur personal info). *"Car officially leaves the Korean system."*
4. **Loading**: reuse the #7 footage.
5. **Ship tracking**: map on your phone. *"Day 12: somewhere in the ocean."*
6. **Delivery**: the client films the unboxing/handover (ask them to film it vertically). Their reaction is gold.
7. **Final receipt**: total paid vs local price.

CTA on every part: "Follow so you see it arrive. Comment NEXT if you want to be the next client."

🎬 VIDEO 9: "Korean Spec Features You Don't Get at Home"

Length: 20–25s | **People:** just you | **Filming time:** 10 min inside one loaded car (Genesis / Palisade / Sorento)

Why it goes viral: "wow" moments. Viewers tag friends ("we need this"), and it makes Korean cars feel premium.

Script:

Time	Shot	Script	On-screen
0–1s	Your hand presses a button and the seat starts blowing air on your face	"Korean cars have features you've never seen."	🤯 **KOREAN SPEC**
1–5s	Ventilated seats	"Air-conditioned seats."	❄️ cooled seats
5–9s	Blind-spot camera appears in the cluster when signaling	"Turn signal shows a live camera."	📷 blind-spot view
9–13s	HUD on windshield, 360 camera	"Head-up display. 360 camera."	HUD · 360°
13–17s	Rear seats: massage / sunshades / relaxation seat	"Massage seats in the back."	💆 massage
17–22s	You	"This full-option car delivered to [CITY]: $___. Comment SPEC for the list."	Comment **SPEC**

(Show only features the actual car has.)

🎬 VIDEO 10: "Asking Koreans: Which Car Would You Never Buy?" (street interview)

Length: 25–35s | **People:** you plus strangers (or your colleagues / dealers if you're shy) | **Filming time:** 1 hour for 6–8 good answers

Why it goes viral: street interviews are one of the most viral formats. Korean faces and reactions are exotic to foreign audiences, and the answers start debates.

Questions to rotate (one per episode):
- "Which car would you never buy?"
- "How much did you pay for your car?"
- "Why do Koreans sell cars after 3 years?"
- "Hyundai or Kia?"
- (to dealers) "Which car do foreigners buy most?"

Script:

Time	Shot	Script	On-screen
0–2s	Mic toward the first person, strongest answer first	Answer first, no intro	Subtitles plus **Asking Koreans (KR)**
2–25s	4–6 quick answers, cut tight, subtitled	(their answers)	subtitles, emojis
25–30s	You	"So which one would YOU buy? I can send any of these to [CITY]. Comment CAR."	Comment **CAR**

Tips: ask permission. Dealers in car complexes are easy, friendly targets. Use a handheld mic with a logo cube, since people react to a "real" mic.

Posting plan: first 2 weeks

Day	Post
1	#1 Guess the Price (Palisade)
2	#4 Korean Grandpa's Car
3	#7 POV Leaving Korea
4	#5 Your Budget
5	#6 3 Traps
6	#9 Korean Spec
7	#10 Street Interview
8	#2 The Receipt
9	#1 Guess the Price #2 (Carnival), reply to top comment
10	#3 Auction
11+	#8 client journey parts as they happen, plus repeat whatever performed best

Rule: after 7 days, whatever got the most views and shares becomes a daily series.
Report results with `/results` so I can learn which ones win.

Comment-to-DM sales machine

1. Every comment with the keyword gets an auto-reply or a quick reply: "Sent you a DM 🔥"
2. DM: "Hi! Which car and which city? I'll send you the full delivered price today."
3. Send the receipt (from `landed_cost.py`) plus a 10-second personal video of a matching car.
4. Close: deposit, then start the journey series with them (they become content, Video 8).
